ABOUT ME

I am an audio engineer & sound recordist with over 10 years of professional experience. I have found that I am most successful when I have a creative goal, a task to focus on, & a deadline to meet. I am seeking opportunities to develop my career in production audio.

KEY SKILLS

Experienced Pre & Post Audio Engineer

I have extensive experience recording sound on location and in studio for dialogue, ADR, sound design, foley, etc. As well as post-production sound editing, mixing & broadcast standard mastering. Both as an independent freelancer & employee of Videoheads, BIMM Brighton, Pool Valley Records, & more. I am extremely proficient in RF technology and on set mixing, and also with software such as Protools, Logic, Reaper, Izotope RX & Ozone, as well as the Adobe Suite.

Independent & Team Project Coordination

I use effective communication, & up to date & accurate project documentation to meet client expectations & deadlines. Both as a freelancer in numerous projects (Peckasso, Pesticide, Hellion's Curse, etc.), & assisting in production tasks for national television & branded projects (BBC, Channel 5, Media Zoo, etc.).

PORTFOLIO

SHOOT LOG
